Reduce and Distance Plant Personnel while Boosting Output and Preventing Contamination

with automated, enclosed bulk equipment and systems from Flexicon

Automated, sealed BULK-OUT® Discharger-Conveyor Systems replace multiple workers dumping hand-held bags manually, while preventing contamination.

Enclosed Bulk Bag Weigh Batch Systems feed a central weigh hopper mechanically, and remove weighed batches pneumatically, requiring labor only to attach/detach bulk bags.

Bulk Bag Discharging Systems can loosen solidified material and meter it into liquid streams (shown), screeners, size reduction equipment and continuous blenders—automatically.

Dual SWING-DOWN® Bulk Bag Fillers fed by weigh hoppers fill up to 40 bags per hour with only one operator connecting empty bags and one forklift removing full bags.

Flexicon Bulk Bag Filling Lines automatically dispense pallets, fill bulk bags, and disconnect/accumulate filled bags, minimizing operator involvement.

TIP-TITE® Drum/Box Dumpers seal, tip and mate a discharge cone to a gasketed hopper lid, open a slide gate and feed downstream processes automatically and dust-free.

Flexicon automated equipment and systems can move your bulk materials at higher capacities with fewer personnel, cutting costs while distancing operators from one another.
