

Flow-Through Sifter

SMICO has developed a process or packaging safety scalper that fits tight places, called the SMICO FLOW-THROUGH SIFTER. It is in-line and has a low profile.

The SMICO FLOW-THROUGH SIFTER's are easy to install and hang from 4 cables. The body and screen are stainless, and the carbon steel frame work is coated with FDA approved enamel.

The SMICO FLOW-THROUGH SIFTER is available only in stainless steel 24, 30, & 40" diameters with 2.4, 4.0, & 7.2 sq. ft. of screen area res

Most suitable screen hole size is 4 mesh through 10 mesh. Depending capacity and application, finer meshes can be used.

The SMICO FLOW-THROUGH SIFTER's are powered by .25HP, TEFC, 230/460/3/60 motors, less controls.

FEATURES QUICKEST CLEAN-UP DESIGN!

The SMICO FLOW-THROUGH SIFTER is great when used for final safety of Food Products.
