

Fully Engineered

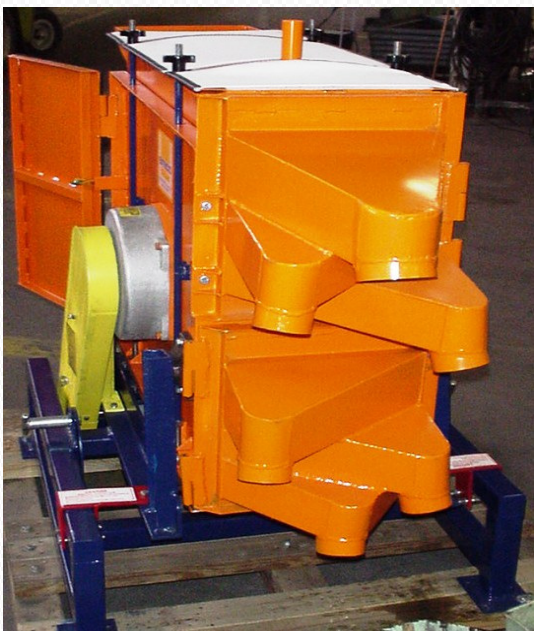

FRACTIONATOR

SMICO vibrating screeners provide LOW Operating Cost, Excellent Product Classification and High Production with Minimum Maintenance.

The Fractionator provides "real world" lab results when running tests on samples unlike the normal test sieve products that give exacting measurements.

The Fractionator breaks up to 25 Gallons of Aggregate and Dispenses 6 individual Fractions in 30 Seconds

- Six Separate Screen Decks***
- Each deck has an individual Discharge Chute***
- Also has a bottom Discharge pan for fine Materials***
- Decks Slide in & out Easily***
- Frame is made of Heavy Carbon Steel***
- Drive System is a Centroidal Mounted SMICO Vibroset with counter-balanced eccentric and adjustable stroke***
- Bearings are SMICO 60mm grease lubricated and sealed for life***
- Motor is 1 HP, TECF, 1750 RPM, 115 VAC/ single-phase/60Hz***
- Available in a full range of screens***
