

*Fully Engineered*

## **VIBROFINISHER**

SMICO vibrating screeners provide LOW Operating Cost, Excellent Product Classification and High Production with Minimum Maintenance.

### **SMICO Vibrofinishers use:**

#### **-Positive Eccentric Action**

Finishing Amplitude Stroke Remains Constant as Work Load is Varied

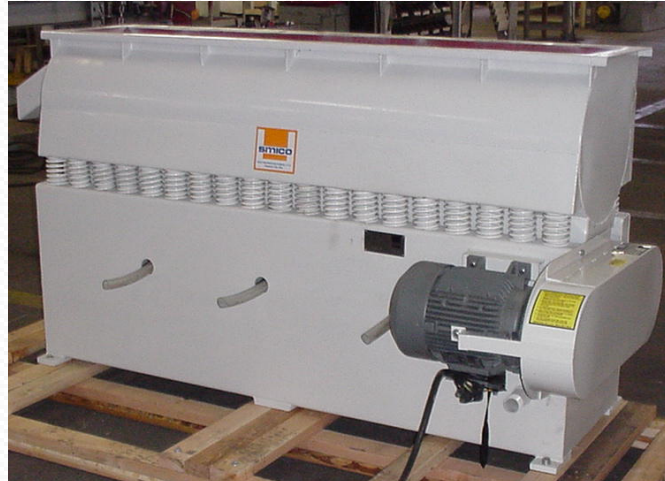

#### **-Adjustable Stroke**

Variable Amplitude-Four(4) Settings up to 3/8" Throw for Aggressive or Precision Fine Finishing

#### **-Automatic Lubrication**

Continuous Positive Grease Lubrication for Constant and Exact Lubrication-Eliminates Bulky Air Hoses, faulty Timing Mechanisms and Clogging Oil Lines

#### **-Automatic Controls**

***The SMICO Vibrofinisher is a Drum Tumbler for Deburring and/or polishing production runs of small parts.***

#### **-Variable Frequency**

Variable Speed Drive-Hand Controlled 1000-2400 RPM, Control Finishing Speed by Varying Frequency

#### **-Flow-Thru System**

Self-Contained Compound Metering System With Flow-Thru for Clean Parts and Media. Compound is Metered at Desired Flow

***All Features Standard Equipment at no additional cost.***
